

Commitments for Sprint-3

Sprint Goals:

Goals of B range:

Goal 1: We will have implemented searchability for the searchable users which will let the user to connect with different users.

Goal 2: We will have created different types of message-handles for functionalities relating to messages (group message and private user message) like getting all past messages, deleting specific message, private reply to individuals on group message.

Goal 3: We will have handled user receiving all updates from the prattle server which will include various error and success messages. We will have created a “help” functionality for the user to give information about all the functionalities that user could use.

Goal 4: We will have implemented the functionality of queueing up the messages when the receiving user is offline and retrieve the messages once that user logs back in and send the messages to that specific user in correct order of time.

Goal 5: We will have allowed moderators to change a group setting.

Goals of A range:

Goal 6: We will have the goals for the next sprint ready.

Goal 7: We will have implemented a feature which will allow a user to follow another user

Goal 8: We will have implemented a feature for user to look for other online users
