

# Commitments for Sprint-2

## **Sprint goals:**

### **Goals for B range:**

**Goal 1:** We will have created a table in the database for Users which will store an entry for each user of the system along with the required profile attributes.

**Goal 2:** We will have implemented the login functionality for a client which will allow the client to log-in to the system using username and password.

**Goal 3:** We will have created a user service to enable the system to interact with the database. This will allow the updating of user profiles.

**Goal 4:** We will have created Backlog in Jira which will be worked on during upcoming sprints. Each person will have created a backlog item on which they will be working on. Each person in the team will have worked an item in the backlog and marked the item done at least once. Each member in the team will have pushed at least one smart commit. We will have created a sprint (Sprint-2) in jira for the ongoing tasks and marked the tasks as done by the end of the sprint.

**Goal 5:** We will have pushed the new code to master branch with required checks like the Junit coverage and code smells. Each member will have worked on developing functionalities and writing unit test cases to achieve the required code coverage for pushing the code to master.

---

### **Goals considered for A range:**

**Goal 6:** We will have the goals for the next sprint ready.

**Goal 7:** We will have created a Group Service that will perform CRUD operations on the Group table that we will have created in the database.
