

Commitments for Sprint-3

Sprint Goals:

Goals of B range:

Goal 1: We would have implemented searchability for the searchable users which will let the user to connect with different users.

Goal 2: We would have created different types of message handles for functionalities relating to messages (Group Message and Private User Message) like getting all past messages, deleting specific message, private reply to group message

Goal 3: We would have handled user receiving all updates from the Prattle server which would include all the error and success messages. We would have created a help functionality for the user to give information about all the functionalities that user could use.

Goal 4: We could have implemented the functionality of queuing up the messages when the receiving user is offline and retrieve the messages once that user logs back in and send the messages to that specific user in correct order of time.

Goal 5: We would have allowed moderators to a change the group setting.

Goals of A range:

Goal 6: We would have the goals for the next sprint ready.

Goal 7: We would implement a feature where a user will be able to follow another user.

Goal 8: We would implement a feature for user to look for other users online
